## RAINS HELP CROPS

The government crop report for Tennessee for the week ending Sept. 4 says: The rains of the week covered the state pretty generally and did a great deal of good. While much corn and cotton can not recover from the damaging effects of the recent drought, a large percentage of the late planted will be greatly benefited. This applies also to tobacco, potatoes, peanuts, peas, beans, etc. The general condition of corn averages fair to good at present, with a tendency to improvement. Cotton also averages fair to good and may show some improvement due to the rains. It is opening rapidly and picking has begun. Late tobacco is making rapid growth since the rains.

## KEEP YOUR BONDS

Owners of Liberty bonds should not only keep them but should buy more, says Maj. Rutledge Smith, whose attention has been called to a statement to the effect that promoters of questionable stock and bond schemes have been preying upon Liberty bond owners in another state and inducing them to trade their bonds for worthless stocks, usually in oil, which the sharpers will promise to yield many times the sum earned by the bonds.

As an evidence of the extent to which this practice has been followed the statement is made that in one county a semi-official check showed that of thirty million dollars of bonds one-half had been sold at a sacrifice or traded for worthless stocks through the misrepresentations of sharpers. If you must dispose of your bonds be sure that you deal with some reputable banker and turn a deaf ear to the oily talk of the stock promoter.

## RETURN THE BARRELS

To the People of Tennessee  
A careful investigation by this office reveals the fact that one of the reasons for the scarcity of gasoline in Tennessee is that people to whom gasoline is shipped in iron barrels are not taking prompt steps to return the barrels, which the present war situation renders necessary. Therefore, I strongly urge the people to immediately empty the iron barrels and return them promptly to their owners. By doing this you will greatly improve the gasoline situation, and will be helping the movement of badly needed gasoline to our troops in Europe. Get busy—start the barrels rolling.

## NEW FLOUR RULES

Except when Liberty mixed flour is sold, every dealer hereafter will be required to sell one pound of substitute for every 4 pounds of straight flour. With every 24 pound sack must be sold 6 pounds of meal or other substitute and the purchaser will be expected to mix the substitute with the flour before same is used.

The only exception to this rule is when the farmer takes corn grown on his own land to mill, has same ground into flour or meal and the miller certifies on a corn toll card that so much has been ground for the farmer and against this card the merchant may sell flour at the rate of 4 to 1. The merchant making sale will take up card, keep same until the flour allowance is consumed, if not all at once, and then turn same over to food administrator.

The rule limiting quantity is rescinded but everyone is expected to save all the flour they can.

## Sugar

Sugar rule remains for the present the same and merchants may continue to sell customers 25 pound lots for September under proper affidavits.

J. N. COX,  
County Food Administrator.

## DON'T EXAGGERATE

The Detroit Free Press prints an interview with Maj. Jules Bellot, a member of the French high commission to the United States, deploring the exaggeration practiced by the American press regarding the recent Allied operations in France. According to Maj. Bellot, who is instructor in tactics in the French army, there is not and never has been any reasonable chance of encircling the German army or of capturing hundreds of thousands of troops—neither has there been any intention of so doing. The crown prince was in no danger of being pocketed, and his escape was not miraculous. Instead of the 400,000 captured of the British rumor and reprinted in our papers, the number as stated in the French official communiqué of prisoners taken was 400 on that date. Gen. Pershing reported the fighting between the Marne and Aisne in the conservative phrase of "severe fighting."

the value of this feat, but the Free Press, we think, is right in its contention that undue exaggeration will tend to such belittlement. To play up the event in sensational and impossible facts and figures is to make the final impression of a victory almost a failure.

There is no need of exaggeration to stimulate our pride and patriotism and the reaction of disappointment is a real danger to be avoided.—Tennesseean.
